Company announcements

Welcome to the Danish FSA's database for company announcements. Here you can find all publicly available announcements submitted to the Danish FSA. The database of the database was established in June 2007.

If you have a registered account you can submit announcements as an issuer or notifications as a major shareholder, a manager or related party, or as a shortseller. Notifications submitted as a major shareholder or manager or related party will not be available to the public after submission. Some information from notifications about net short positions will, however, be available to the public after submission. According to the shortselling regulation, all submitted net short positions at or above 0.50 % as well as notifications about existing net short positions falling below the 0.50 % threshold shall be visible to the public.

Search announcements

The database contains more than 130,000 announcements from both issuers as well as notifications from shareholders, managers and shortsellers.

Notification

If you need to submit an announcement or notification, please choose the type of announcement or notification you would like to submit. You can choose to submit a publicly available issuer announcement or a non-public notification to the Danish FSA alone as a major shareholder or manager or related party. Or you can choose to submit a net short position as a shortseller where the size of the net short position determines whether or not your notification will be publicly available.
